

FOR RELEASE February 23, 2007

## Delta's Live, Online RMC Motion Control Training is Instructor Led and Cost Effective

February 23, 2007 – Vancouver, WA – Delta Computer Systems, Inc. has added comprehensive RMC Motion Controller Technical Training Courses using live online instructor led education.

The 8-hour Live Online Training Courses are fully interactive with an actual Delta RMC motion controller for each student (accessed via Internet). The “hands on”, instructor-led training covers setup, tuning, programming and diagnostics of RMC motion controllers for closed loop position and velocity control through a series of lessons and lab exercises.

These conveniently scheduled education sessions are a cost effective alternative to Delta's traditional, in person, classroom training, as they eliminate travel and lodging expenses.

Each student receives a detailed training manual with step-by-step instructions and illustrations. Sessions are 2 days of 4 hours per day with 4 to 8 “hands on” laboratory exercises including more challenging “bonus” labs. Special sessions are available for position-pressure/force control as an advanced phase of training.

These user-friendly courses offer detailed information on Delta's RMC70Tools or RMCWin software including:

- An Overview of Delta RMC70 or 100 Series Motion Controllers
- RMC Software Navigation and Step by Step Startup Procedures
- Communication and Feedback Choices
- Issuing Commands and writing User Programs
- Diagnostics and Troubleshooting using visual Plot Managers
- Tuning Methods, Scale and Offset Wizards

“Every student has full access to their own motion controller during this instructor taught class. This makes the training come alive in a way that canned programs cannot duplicate,” stated Delta training specialist, Brad Smith, “Detailed manuals also serve as a reference guide during the sessions or when using Delta's website for 24/7 connection to on line simulators after the classes”, Smith added.

To **Register** go to <http://www.deltamotion.com/company/education/training.php> or call Delta for details on schedule and class outlines.

About Delta Computer Systems: For more than 20 years, Delta has been a supplier of motion controllers, color sensors, and other industrial products that enable OEMs and integrators to build better machines and get to market quickly.
